My Portfolio

Portfolio Summary:

With an evident inclination towards front-end development, this user exhibits a robust usage of JavaScript, along with a deep understanding of SCSS, CSS, and HTML. Their coding capabilities are backed by an extensive portfolio that includes a range of dynamic and innovative projects, each illustrating their proficiency in an array of technical skills and problem-solving techniques.

The user's diverse tech stack manifests their expertise in the industry and shows their adaptability to different project requirements. Their strong proficiency in SCSS, CSS, HTML, and JavaScript enables them to create seamless, functional front-end environments.

The user's GitHub projects showcase their capacity to innovate, their methodical approach, and their commitment to detailed documentation. They have participated in hackathons, which proves their ability to operate effectively under pressure and deliver high-quality code in a critical environment. The repository 'hackathon-1' reveals their professional approach to competitive coding, providing an intensive understanding of tech stack, including SCSS, CSS, HTML, and JavaScript.

Projects

Project: hackathon-1

Description: This GitHub repository named "hackathon-1" is likely a project or a set of files created for the first hackathon event by a team or an individual. It may contain coded solutions, ideas, scripts, or any other digital assets created or used during the hackathon. The repository might also include a readme file detailing the purpose of the project, how to install or use it, and other relevant information.
Tech Stack: SCSS,CSS,HTML,JavaScript
GitHub Link: https://github.com/mimschowdhury/hackathon-1

Project: mimta-chowdhury-capstone

Description: This GitHub repository, "mimta-chowdhury-capstone", likely contains the

capstone project of a user named Mimta Chowdhury. The specific contents aren't specified by the name, but it could include code, data sets, analyses, documentation, or other materials related to her final project in a course or professional program. The topic or language of the project aren't specified, so they could vary widely, depending on the nature of her studies or work.
Tech Stack: JavaScript,SCSS,HTML
GitHub Link: https://github.com/mimschowdhury/mimta-chowdhury-capstone

Project: mimta-chowdhury-capstone-api

Description: This GitHub repository, "mimta-chowdhury-capstone-api", likely contains the work done by a person named Mimta Chowdhury for a capstone project involving the use of an API. The repository might include the source code, resources, documentation, and other useful information related to the development and implementation of said API for this capstone project.
Tech Stack: JavaScript
